

## GRAPHING CALCULATORS

The freshmen at Rosati-Kain are required to purchase a graphing calculator which will be used all four years. Before making a decision about the required model, the Math and Science departments research the newest technologies available from the leading calculator manufacturers. Your daughter will be required to purchase the model that will be used by the R-K Math & Science Departments.

The model we are requiring for the class of 2013 is the **TI 84-Plus Silver Edition**. It costs approximately \$130, but often can be found on sale closer to the beginning of the school year. It will be your responsibility to purchase this calculator by the beginning of the 2009-2010 school year. Please save your proof of purchase (POP's) from the packaging for your daughter's math teacher. These POP's allow us to purchase additional Texas Instruments equipment for the benefit of our students.

For more information about how graphing calculators improve student performance, please check out:
